

REDIET SOLOMON

DevOps, Cloud & AI Infrastructure Engineer | Kubernetes · CI/CD · Observability · GPU Platforms

Addis Ababa, Ethiopia | Open to Remote Roles

redisolomon2@gmail.com | +251 904 117 514 | github.com/Rediet2000 | linkedin.com/in/rediet-solomon2 | rediet2000.github.io/devops-portfolio

PROFESSIONAL SUMMARY

DevOps and Cloud Infrastructure Engineer with 5+ years architecting, automating, and operating high-availability production systems across cloud (AWS, GCP, Azure), on-premises virtualization (Proxmox/KVM, OLVM, Hyper-V), and edge environments. Specialized in CI/CD pipeline engineering, Kubernetes operations, Infrastructure as Code, and full-stack observability, with recent depth in AI-ready platforms — GPU inference infrastructure, SDN fabrics, and distributed telemetry. Proven record delivering end-to-end automation for enterprise ERP, banking, and AI/ML workloads, and resolving critical production issues across cloud, virtualization, networking, and application layers.

CORE TECHNICAL COMPETENCIES

- **Cloud & Compute:** AWS (EC2 g4dn/g6/c6i), GCP, Microsoft Azure (AKS), multi-cloud architecture, NVIDIA T4/L4 and Jetson AGX Orin, high availability, backup & disaster recovery
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes, AKS, Helm, Traefik, container networking, cluster deployment & administration
- **CI/CD & Infrastructure as Code:** Jenkins (Groovy DSL), GitHub Actions, GitLab CI/CD, Azure DevOps, Terraform, Ansible, Git, Python, Bash/Shell scripting, GitOps
- **Observability & Telemetry:** Prometheus (custom exporters), Grafana, OpenTelemetry, SigNoz, ELK Stack, ClickHouse, Zabbix, DCGM GPU metrics, centralized logging, distributed tracing
- **Networking & SDN:** ONOS (OpenFlow), SR-MPLS, FRRouting (BGP/OSPF), VXLAN, Open vSwitch, OPNsense/pfSense, VLANs, NAT, DNS/DHCP, WireGuard VPN, HAProxy, Nginx, Cloudflare, TLS/SSL
- **Databases:** PostgreSQL (Patroni HA & clustering), MySQL/MariaDB, Oracle, Redis, ClickHouse, replication, backup & recovery
- **AI/ML Infrastructure:** YOLOv8, CUDA/TensorRT, Ollama (Llama 3.1), NLLB-200, PyTorch, FastAPI, DRL (DQN), LSTM, GPU workload scheduling
- **Systems & Virtualization:** Linux (RHEL/Ubuntu/CentOS), Proxmox VE, Oracle VM & OLVM, Hyper-V, KVM, Windows Server, Active Directory/LDAP, server hardening, patch management

WORK EXPERIENCE

Remote AI Infrastructure & SDN Engineer — MetaPlux / DDEF Engineering

Jun 2025 – Apr 2026

Remote

- Deployed GPU-based AI inference services (YOLOv8, TensorRT FP16/FP8) on NVIDIA T4, L4, and Jetson AGX Orin for real-time image processing across a 5-node hybrid cloud mesh (AWS, GCP, NYC edge).
- Built an SR-MPLS traffic-engineered fabric with FRRouting, an OSPF underlay, and VXLAN overlays controlled by an ONOS OpenFlow SDN controller with full topology discovery.
- Established end-to-end observability using Prometheus custom exporters, SigNoz, OpenTelemetry, and Grafana covering inference latency, DCGM GPU telemetry, and network performance KPIs.
- Implemented edge-to-cloud inference workflows driven by DQN-based placement logic and LSTM time-series prediction for workload scheduling.
- Created systemd persistence services for VXLAN tunnels and OVS bridges, resolving Jetson kernel MPLS limitations through OVS-only forwarding, with engineering documentation for operational handoff.
- Contributed to a 28-claim utility patent (NTX-001-NP) covering distributed compute orchestration, closed-loop rerouting, and intent-based API architecture.

DevOps, System & Infrastructure Engineer — Hagbes PLC

Jan 2024 – Present

Addis Ababa, Ethiopia

- Lead DevOps and infrastructure operations for a multi-server Odoo 18 ERP ecosystem (Odoo, AI VM, PostgreSQL/HAProxy cluster, Traefik, SigNoz) serving the leading construction machinery dealer in Ethiopia.
- Designed and implemented a 14-stage Jenkins CI/CD pipeline with automated quality gates, database backup, Telegram approval gates, and blue-green deployments, cutting deployment time by 87%.
- Deployed OpenTelemetry Collectors with OTLP export and batch/retry policies to ship structured logs to SigNoz, and built Grafana dashboards and alerting for user activity and service health.
- Built an AI-powered multilingual customer support chatbot on Ollama (Llama 3.1 8B) with NLLB-200 12-language translation, a FastAPI backend, a Telegram bot, and an embeddable JavaScript widget integrated with Odoo 18 Helpdesk.
- Configured high-availability PostgreSQL with Patroni, administered MySQL/MariaDB instances, and orchestrated traffic delivery with Traefik, Nginx, HAProxy, and Cloudflare.
- Automated resource provisioning across Linux and Proxmox VE hypervisors with Terraform and Bash, and maintained multi-environment container deployments using Docker Compose, Kubernetes, GitHub Actions, and Jenkins.
- Developed custom Odoo 18 modules (user manuals, service monitoring, Telegram user management) with RBAC and webhook architecture, and configured coturn TURN for WebRTC plus mailcow SMTP relay with SPF/DKIM, OPNsense NAT, and Cloudflare DNS.
- Led root-cause analysis for production incidents across network, container, database, and system layers, increasing overall service availability.

DevOps Engineer (Freelance) — Marsbes Tech

Jan 2025 – Present

Remote

- Deploy and manage applications with Docker and Docker Compose across Linux-based production environments.
- Administer containers, images, volumes, networks, and application configuration to keep services running reliably.
- Manage PostgreSQL database backups and maintain infrastructure documentation in line with DevOps best practices.

DevOps Engineer — Atlas Computer Technology

Apr 2022 – Jan 2024

Addis Ababa, Ethiopia

- Containerized core enterprise applications with Docker and Kubernetes to guarantee environment parity and scalable deployment.
- Provided 24/7 infrastructure monitoring and deployment support for mission-critical banking services, including Wegagen Bank USSD/E-Banking, Hijra Bank E-Banking, and Siinqee Bank systems.
- Deployed full-stack monitoring and centralized logging with Prometheus, Grafana, Zabbix, SigNoz, OpenTelemetry, and the ELK Stack, and partnered with development teams to improve release stability.
- Administered Linux servers, database systems, and application environments, enforcing security policies, high-availability standards, and rapid production incident resolution.

Junior System Engineer — Atlas Computer Technology

Nov 2021 – Apr 2022

Addis Ababa, Ethiopia

- Maintained virtualized environments and Linux servers to hold system stability and performance SLAs.
- Managed pfSense firewalls, configured VLANs and VPN tunnels, and implemented network security rules.
- Set up system monitoring with Zabbix and Grafana to support prompt incident resolution.
- Supported corporate infrastructure including Proxmox, OLVM, Nginx, Apache, WildFly, HAProxy, Zimbra, Mailcow, and Exchange.

KEY PROJECT HIGHLIGHTS

- **DDEF Hybrid Multi-Cloud Mesh (2025–2026):** End-to-end SDN fabric across AWS, GCP, and Jetson edge using SR-MPLS, ONOS, FRRouting, VXLAN, and OVS, with a DRL (DQN) placement engine under unified telemetry.
- **AI Inference Platform (2025–2026):** GPU-accelerated real-time inference with YOLOv8/TensorRT on T4, L4, and Jetson, exposed through REST APIs with Prometheus and DCGM telemetry for edge-to-cloud orchestration.
- **Automated Odoo 18 Delivery (2024):** 14-stage Jenkins pipeline featuring database backup, approval checks, SigNoz annotations, and blue-green releases, reducing delivery cycles by 87%.
- **Hagbes AI Support Chatbot (2024–Present):** Multilingual support system on Llama 3.1 and NLLB-200 across 12 languages, with a Telegram bot, embeddable web widget, and Odoo 18 Helpdesk integration.
- **Banking Infrastructure Support (Wegagen, Hijra, Siinqee):** Highly available infrastructure, application deployment, monitoring, and live operational support for USSD and digital banking platforms.

EDUCATION, CERTIFICATIONS & LANGUAGES

Bachelor of Science in Computer Science

2018 – 2022

Admas University — Addis Ababa, Ethiopia

Certifications: Programming Fundamentals · AI Mastery Training Program · Continuous Deployment Pipeline · Kubernetes Threat Modelling

Languages: English — Professional Working Proficiency · Amharic — Native
